#### Field summary for AssociatedList

The following list may or may not represent associated conditions related to the "Morgellons" condition. Have you ever been examined or diagnosed for any of these following conditions?

Answer	Count	Percentage
Lyme disease (1)	32	15.31%
Spirochete infection (2)	6	2.87%
Borellia infection (3)	13	6.22%
Babesia infection (4)	4	1.91%
Erlichia infection (5)	1	0.48%
Bartonella infection (6)	3	1.44%
Anaplasma infection (7)	0	0.00%
Delusional parasitosis or delusional infestation (8)	20	9.57%
Bovine digital dermititis (9)	1	0.48%
Agrobacterium infection (10)	0	0.00%
Unexplained dermopathy (11)	21	10.05%
Chlamydia (12)	22	10.53%
Association and/or contact with external organisms, eg. insects, arthropods, etc. (13)	24	11.48%
Chronic fatigue (14)	32	15.31%
Fibromyalgia (15)	24	11.48%
Autism (16)	1	0.48%
Dyslexia (17)	4	1.91%
Herpes (eg. shingles) (18)	29	13.88%
Multiple Sclerosis (19)	1	0.48%
Amyotrophic Lateral Sclerosis (ALS / Lou Gehrig's Disease) (20)	2	0.96%
Lupus (21)	8	3.83%
Restless leg syndrome (22)	12	5.74%
Gulf War syndrome (24)	0	0.00%
Parkinson's Disease (25)	0	0.00%
Any other clinical diagnosis or condition (describe below if checked) (23)	13	6.22%

		and black hours conning out of the fability	

050	that did NOT want to go away!
353	HSV
368	Delusion of parasites- I disagree because they aren't delusional
388	Morgallons. But then they say it's stress
414	Diagnosed with herpes 34 yrs. ago. Examined for mites 4 yrs. ago, but think now it was morgellons just starting.
440	I was diagnosed with Lyme disease and the test show Borrelia Burgdorferi and
464 472	I have not had huge fibers coming out of lesions. The fibers and fibrous cocoons used to be a bigger problem. Think some of my treatment has beat it back somewhat but it hasn't been cured in 15 years. None, I had to demand expensive small quanity of elimite from the Dr.'s every time until I
475	started making my own! Bartonella
	Borrilia
478	undetermined
520	Fybromyalgia from what I have read on it sounds like what I have currently.
526	Herpes, Fibromyalgia, Chronic Fatigue
563	Treated for scabies 2 years ago never has gone away no parasites ever dicumented
569	dop, i have morgellons, the fibers are in my eyes. i have microscope pictures of filaments burrowing through my hair follicles, my ear canals are infested with filaments. Jan Smith has many of my pictures.
603	Symptoms alike Morgellons
615	Have been told that she has morgellons in the sinuses by two different health practitioners but
	not by a medical doctor. Have seen that she has the frequency of morgellons in her. I believe that she does.
622	I wasn't, the first doctor asked what has the government done now? I was young and at an
	early age I learned the gov doesn't care about us. I'm pretty sure I fit the parameters for Lyme just waiting for a good test to come forward. Pretty sure I have one of the Mycoplasmas that are giving folks difficulty as well.
623	dr mentioned in passing i had restless leg syndrome
645	Unexplainted dermopathy: after my smallpox vaccine I developed a really painful terrible rash on my forehead. Bumps developed & would get hot and oooze clear liquid.
	l do not have Morgellons today - was cured a month ago. (never diagnosed - my dr doesn't believe in it)
683	No diagnosis. I saw several MDs and dermatologists when my symptoms were bad - very
	painful, life-altering, awful. No one helped. I had to deal with it on my own with the sauna/diet etc.
696	I think fibromyalgia is actually Morgellons. I am not afraid of parasites. I never once said that I was afraid of parasites. I do not think I have parasites. The doctors are the ones who are delusional and insane as they refuse to look at physical symptoms and take samples.
699	I had one positive Lyme and two negative Lyme results ??
713	chlamydia agreed but unsure of how it was contracted
722	I don't think i have any lyme symptoms but im certain i have a milder case of morgellons.
774	No doctors in Kansas seem to know anything about Morgellons and the labs always come back negative because they don't know what they are looking for
786	I was diagnosed with scabies but the prescribed scabicide does not seem to have provided
799	relief despite repeated applications. Lyme
	Morgellons Dopdo not agree with dop
817	scabies and delusional both eventually stated as wrong and with growing evidence of a
	micromyaisis
820	All but chlamydia Herpes was tested
	I have had a tough few years. The others make sense
836	delusional parasitosis. psychotic
840	Possible Lyme disease and chronic fatigue. Have had shingles in past.
841	Western Blot Series confirmed Lymes and Epstein-Barr
865	In the mid 90s I was dealing with something like chronic fatigue. By my experience and intuition I feel like this may have been some type of Epstein-Barr situation. There was never any conclusive diagnosis, but one Doc asked me if I had had mono. That is where the pattern
	recognition had ended up in that sequence of inquiry.

885	Delusions of parasitosis
892	in 2007, neurotic uticaria. I was not neurotic, and don't know why my arms itched and became scabby.
897	Rikketsia
901	parasitosis
915	I am wondering that I might have Morgellons. I document chemtrails in my backyard. I started having severe itching about July 2015. Feels like fuzz comes over my body. Sometimes it looks like flecks out of body. Maybe bugs. I am going to buy microscope. Doctors here would think I'm crazy or say anxiety.
931	fibromyalgia not everything matches up
932	Scabies because the treatments never worked. I've had the problem for approximately 19 years and no doctors believe that.
945	A dermatologist told me I had delusional parasitosis.
961	I diagnosed myself with morgellons desease as I had open wounds for month
964	bipolar but not sure about morgellons
969	CFS, EBV, CMV, I believe I have Lymes. Hod one test, negative but have all the symptoms. Most tests in U.S. not accurate. Mold and mersa in sinus's. Had a huge list of harmful mycrobs in my jaw.
975	not sure about delusional parasitosis
986	The CFS was an umbrella for what was clearly some sort of mycoplasma I fection, although blood tests didn't show anything because these bio weapons are undetectable.
988	Lyme, I agree with, I disagree with bi-polar
994	Aspergers. Seems to fit.
1005	Herpes (positive): Agree Lyme (negative): Not 100% sure
1014	I have been diagnosed with herpes. I also suspect Lyme or Borelia
1045	Lyme test was neg. Within past year

92	Lost job due to 3 week absence for crusted scabies		
99	Adrenal stress and heavy me	etal toxicity are ma	in concerns. Awareness and research to help
	keep this under control is mo	st important to me	
109	I have high pitched ringing o WIFI OR CELL PHONES O COMING OUT OF MY FAC	r tinitus , which is b N , AS IT MAKES I E WORSE , AS W	beyond debilitating . ICANNOT TOLERATE MY TINNITUS WORSE AND THE MATERIAL ELL AS MY COLORING TURNS GREY . i AM
	A TARGETED INDIVIDUAL . BEING TORTURED BY SATELITE . I HAVE FREQUENCIES IN THE 2.5 GH RANGE COMING OUT OF ME . I AM LIKE A HUMAN gps , being tracked all of the time. I need to live in a faraday room for prote ction. This is nanotechnology		
110	unable to work normally for a		Tote ction. This is nanotechnology
132			Im too much in action. i need rest. i can walk
	but i cant do sport, too much	muscle pain if i do	) it
140			nours a day and still tired. In constant pain.
145	I was put in a psych ward an		
153	I can no longer hold a job an		
154	sudden unexplained dermopathies, fixed with for example suspect of lupus? which till now hasnt turned out or hasnt been examined, becz patient refused. all the diagnoses lead to uncomfortable instabile health issue. personal effort withouth pharmalogical treatment turned out to be best treatment!!		
155		m on leave from m	v job right now until this skin cran clears up
155	I go nowhere I do nothing I am on leave from my job right now until this skin crap clears up help!		
173	Skin		
183	Husband has no symptoms,	so dismisses my c	oncerns.
189	pain almost every day - pres	sures get to me wh	nen already feel worn down.
197	Hard to explain how it has changed everything, from my married life, to feeling looked at as a basic nut job by the medical people, and feelings of insecurity in public. I do have supportive family and friends who know what I have suffered and experienced and know that I am not at all causing this to happen myself.		
211	Unable to work		
225		f has affected my	n numerous trips to the doctor and lots of personal and professional life; i can no longer
229	My doctor now. confirms I ha	ave Moraellons. it h	as effected me as I can not leave home, I
-		with herbs, I have	saunas daily, I make up distilled water, and
283	Lost my employment	, my ano, ocanni	g, sixin.
298	Lossed 80% of my business		.am just getting better enough to do things on awing my way backhave helped alot of
331		auso startod my h	nealth has been nothing but misery.
388		e all my symptoms	s and say I'm stressedI am because I'm so
406	l retired early	one back nead at	
440	I am bedridden most of the am glued to the bed I need th extremely severe pain I take	ne temperature at $\hat{e}$ large amounts of r nal pain and all the	y depressed I have no energy I feel as though I 53° I can only sleep on my right side I am an narcotics and I had a spinal stimulator installed pain that it radiates all over my body most of
442	psychosis diagnosis was ok	it helped in some	ways at university getting extra allowance for
475	pathways in my brain.		, medication blocked certain learning
475	vvas a midwite until diagnos	s of DOP prevente	ed me re-registering for practice.

	Had positive Igenex lyme test not really understood or recognised for me in UK
520	I am not able to work.
526	Could not exercise at all for over ten years because of the fibro. It got worse. And my colon, stomach and proctitis ulcerosas has made me to go on permanent sick-leave. This has also got me into a chronic fatique .
569	some family members believe i am delusional so i no longer speak of morgellons
603	No social life of confidence
623	not sure but always wondered if the metoprolol causes any of this
683	I work full-time as a professional (lawyer) but find that I am less efficient than usual. I have a hard time finding time to do everything that needs to get done.
686	The dermatologist told me I needed to see a shrink
696	Due to the medical profession's insistence upon calling Morgellons disease a mental illness I have had my personal life destroyed. My family will not help me in any way shape or form. They scream at me to stop posting things about Morgellons disease on Facebook. I think they are embarrassed and ashamed of me. It has caused me to be lonely and sad.
733	with open bad liesions and all this information for Doctors everyone of them called me crazy
799	Every way imaginable
885	I am a registered nurse. I can no longer work as one. My husband was less than sympathetic until it affected him.
892	I lost 2 jobs partially related to the whole set of symptoms
894	EVERY PART OF MY LIFE
897	Doctors have refused to treat me as well as hospitals.
915	Severe back pain.
931	had to give up work
932	People are afraid of catching my skin problems. Have a hard time getting hired anywhere because of skin matter of fact still haven't got a job because of skin problems.
938	chronic fatigueskin a mess
964	job social and the way body feels
969	I was almost a shut in and stayed to myself except friends and daughter would call to ck in.
975	disabled from work for 4 years, stopped dating
986	Extremely difficult for me to commit to plans as my health is severely compromised. I feel ill, exhausted, and very angry when i push myself over my personal threshold.
988	More like the lack of diagnosis. I spent 5 days in a psychiatric hospital and tried to commit suicide 10 months later requiring extensive hand surgery. I am awaiting now on disability determination.
1001	result in no intimate life
1005	Herpes outbreaks have affected sexual activity.

		ike I have anxiety coming from the area that it's		
	occurring but in all actuality it's pain			

464	Movement and itchiness seems to increase at night. I wake up with black specks all over my face even though I bathe before bed. Showers exacerbate the problems, and long soaking baths in vinegar/epsom salts/borax help a lot. Get lots of black specks, white wormy things
472	and other weird shaped things out of my body and into the water. Crawling sensations from the Colembolla not as bad now in Mi as FI! The second I feel an
	arthropod crawl anywhere on me at night, I douse with my pyrethrin lotion!
475	pain in legs and feet upon waking, making it difficult to get going. Skin crawling worse in the evenings.
485	worse @ night & during summer months.
526	In the evening and night when I am tired it got worsened.
535	heaviness
569	eyes are covered with webs and energy level is none existent
594	Skin starts iching.
603	Itch and crystal like
	More than 7 months Treated scabies fungus bacteria etc
622	leg cramps and yes I am using magnesium have heard there is some better stuff out there so will let you know.
633	Itching ,anxiety
645	I do not have it now - but they were worse at night.
667	My hands and feet burn throughout the night
683	When my symptoms were bad, they seemed to be worse in the evening
699	Always 2-4am
716	hard to get out of bed due to pain,
716	At the evening i have less things to ocupy myself and therefore i think about my symptoms
122	
750	more.
758	No energy or desire to start the day, feel like wasting time
764	More mucus movement about face
767	Hand numbness and tingling
774	Lots of itching and crawling sensations
784 786	very stiff in the morning About 4 months ago I had a severe bout of itching that woke me from a sound sleep and a
	abdomen, lower leg/foot, and buttocks. Feared possible shingles and sought treatment from PCP (physicians' assistant actually) who diagnosed as scabies and prescribed Premethrin 5% cream. Applied periodically since but haven't seen any relief of symptoms. Hubby never showed similar symptoms.
	Then noticed tiny black specks within the lesions and every once in a while there would be new pinprick scabs (sometimes a line of them) that would appear somewhere else that would eventually contain the black specks. The lesions are painful and the pain is felt deeper than just on the surface of the skin.
	I will occasionally have itching beneath the skin that seems to be either in the muscle or the bone I can't get to it!
	Around this same time I noticed that my fingers were swollen, stiff and numb/painful when waking up in the morning and often both hands would be completely numb except for a burning type of pain. This eventually subsides, but the numbness/stiffness comes and goes throughout the day.
	I've looked at the black specks under a microscope (after pulling from the skin with tweezers) and they appear to look like tiny pieces of some sort of spongey/packing foam type of substance. I thought they might have been tiny pieces of whatever garment I was wearing, but not sure how they would get under the skin to begin with.
	A Google search of "tiny black specks on the skin" led to Morgellon's and a separate search of "Morgellon's vs scabies" has me convinced I may be dealing with Morgellon's.
788	I have a hard time sleeping. My legs are always uncomfortable
806	i wake up sore i cant fuction i feal the urge to pick i cant help trying to eazy the pain i feel like
	my nose is going to flaten it is worse in this area i itch so bad i just see my live flashing at me it scares me i cry to the people i love for help but no one will believe me
807	my nose is going to flaten it is worse in this area i itch so bad i just see my live flashing at me it scares me i cry to the people i love for help but no one will believe me Leg pain, cramps and muscle soreness

885	The frequency of "stinging" sensations and skin lesions increase after sunset.
892	buzzing and tinnitus at night, also sweats
899	The feeling that something is crawling all over me and in my mouth and that I am being poked with a needle keeps me awake at night. Muscle pain is a progression of this. This used to be only at night but now it is also during the day.
901	more movement on skin and scalp
915	Sometimes around 3 or 5:00 pm
919	lesions crust and material migrates. Scabs crack or irritate as material migrates. sometime pressure from the lesions is intensified by movement, clothing restrictions and weather. there seems to be a cycle and a seasonal cycle.
931	wake up in pain and severely fatigued
932	Itching can be intense at night and effects sleep.
945	Noticed sensations are worse when its dark and warm
961	when I travel to Spain, Netherlands, Slovenia I could eventually have burning loung
	sensation in tit is all day,but more in the evening
964	when it rains my skin will burn or these sores will come on skin like holes with no scabs or blood weird
982	Night time lesions tingle
984	accelerated heart, itching, lint and feel itchy nose and ears
986	Varies throughout the day, but when I'm laying g in bed at night there are no distractions and perhaps I'm just more aware.
1024	My head itches more at night
1045	Anxiety seems to increase almost every evening. Have to take 0.5 mg Klonopin with relief. The anxiety is r/t morgs sxs.
1048	coughing
1069	I have problems sleeping due to nasal irritation. Tingly sensations manifest mostly at night in
	my nose and ear, I feel micro-particulate objects flying into my nose which induces sneezing, coughing, watery eyes, drainage

## Field summary for AssociatedFree

345	I read through your site and immediately s	tarted the protocols with extra vitamin C. Nacetvi

	cysteine, L-glutamine, etcalso took nano silver and ASEA, and did a thorough detox; used clay packs on the rash and it eventually died down and I "recovered"
347	my symptoms come and go, although it seems to be getting better since i ve been putting organic olive oil on my skin after showers. extended exposures to sunlight seems to irritate it.
368	I believe they are effected by energy RF and EMF causes rapid growth and a past personal experiment has shown that they can be made to slow down and go dormant by raising chi
396	and expansion of personal energy field through meditation and/or diet. I also notice if I am out gardening, sunny or cloudy, that if I sweat, arms become very prickly
390	and itchy. I know I need to get inside and wash them.
	I am now trying Benadryl CREAM twice a day to help curtail the scratching. I've also rubbed colloidal silver all over the problem areas with minimal results.
406	Condition is worsened by caffeine, smoking, and lack of sleep.
414	Now have shiny strange looking hair on head, face and in eye lashes, hair seems to try to get into my eyes when pulled out anywhere on my face.
440	Please please please somebody find a cure or some treatment that will help I often feel like I don't know how much longer I can last
464	I used to be strongly led by God to do various projects for society. My connection to God seems to be severed, like he no longer hears me. I've had to really apply myself to regain some of that connection.
475	certain foods make skin worse, especially bread and grains or sweet things.
526	I have discovered that many of my symptoms could be Morgellons. This crawling sensation on my skin is very difficult to ignore. It feels like something is crawling on my skin and on the small hair on my body and face. I don't know what to do. I have tried baking soda and soft soap.
535	l've heard about it
	and support the research
563	Was itchy at first more at night now just a few select areas that remain active at any one time Upper back. Wrist anterior thighs knee
564	my symptoms are the weird healing of skin abrasions my colleague and her mother's symptoms are far more intense.
569	feel terribly ill,v-c,glutathion and nac helps a lot but cost is prohibitive. fear might be losing my mind,suicide is frequently in my thoughts
594	The scales appear thick and weave webs. Pulled out a hair from one pimple and at the end of the hair was a long, fuzzy cotton-like strand of who knows what.
608	I wonder if that thing in my eye is related to morgellons.
622	Think there are many boards with different names but all speak to Morgellons like symptoms. I have 3 what look like fibers on the inside of my leg by the knee.
	Originally, I had blue fibers every morning under my nails packed so tight they were painful as were the wood splinters that weren't (fungal?)
	My body is tired, I keep pushing forward but worked hard when married so I would be able to rest, that never came.
633	Seems to be some external surrounding environmental components that include clothing
645	When I had Morgellons, I would be bed-ridden the day after vacuuming the house. everytime
683	Curiously, my very bad skin symptoms (painful, itchy boils and sores from head to toe, with debris that exuded from them) coincided with highly unusual weather in Milan. It rained or was cloudy for virtually 12 months straight(Oct 2013 - Oct 2014), which everyone agreed (neighbors, friends, etc.) was an extremely odd pattern .I would find bits and specks on my balconies and in house dust that under the microscope resembled the debris that exuded from my irritated skin (blue, red, white and black filaments and sometimes blue/pink
	hexagons). The weather is back to normal now - sunny and lovely, but warmer than usual. I feel much better now but remain keenly aware of this horrible risk that we are all exposed to and want to find answers. I suffered tremendously for many months and my business was also impacted (e.g. I couldn't leave my house to meet with clients), not to mention the pain and suffering and terrifying thoughts that I might be contagious and/or that I might never recover or live a normal life - all without ANY interest or help whatsoever on the part of numerous doctors, who took my \$\$\$ in advance and then sent me on my way. It sure makes
	me wonder why in the world I am paying taxes/insurance for healthcare!!!!
689	i have seen visually with my microscope what is coming out of my body. I have no doubts as to what is happening but not sure of what I am changing into based on their transhumanism agenda

	sooms to mo to whon
699	seems to me to when. I believe and have images videos of what comes from my lesions to be of the Rotifera class and that they have gene transfer capabilities and can mutate to whatever they have came in contact prior to infesting humans and anyone with poor autoimmunity are susceptible to these also believe stimulants and sleep deprivation seem to stimulate there life cycle
716	I had it all over my hands, I sliced the lesions open with a razor blade. with tweezers i chased the moving stuff around slowly pulling it out then soaked my hands in epsom salts and lots of seed thing were ejected. I did this for 2years and finally I got them all. I think. My hands are horrifically scarred from it. but I didn't care I had to those buggers out of me.
722	I think i contacted the disease in the summer when an unidentified fly bit me in the head area.
733	they stay servere
774	What are the small squares with the red dots in them that itch so much and why do I have the
114	same squares in my stools which are clear squares with black dots and they will connect with each other? I need all the information and help I can get on Morgellons.
788	I know I have morgellons. I can get a tweezers and show you which are the fibers and which are just hairs. No problem!
806	help
817	,strange 'wasp like' electron micrographs taken 4 years ago new/reinfestation current, appearing and disappearing nodules, some take ages to disappear others come and go within hours, sometimes appear in rings, sometimes bifocal, sometime exactly bilateral, black grains, white ovoid shapes from skin, searing intermentent rash with scaly drying subsequently, at beginning massive peeling of skin, responds slowly to tar/creosote, laundry blue, capsicin, ivermectin, lavedar and cajaput oils, orange rind/sulphur like soap began after flea bites which resolved and then a trail of fine lesions appeared at nape of neck, scalp, natal cleft and lesions behind pinna HIGHLY resistent/recurrent, severe intermittent pruritus and crawling. wriggling in skin. allergic skin lesions sometimes concurrent, personal life completely deranged with laundry etc everyday, avoidance of upholstery especially old upholstery which seems to make it worse, 2 dermatologists say not scabies. mild skin discolouration in some areas (where long standing), can feel crawling in ear canals when at
0.07	height of or just before outbreaks
827	Symptoms most severe when sitting at the computer for hours, and when I go to bed at night.
829	No healing is taking place
836	Last signs were a year ago. Hoping it's in remmission? I can't go through this again.
840 841	Worse at night or when moving around too much. I'm Both of our symptoms are worse in the mornings-WE CAN BARELY MOVE and are in
041	CONSTANT PAIN, especially in the back and neck-I'm down to a few foods, organic coffee to keep going and water -His legs and or arms swell (Comes and Goes) He said it hurts to just touch any area of his body.
865	I would like to help myself and others arrive at a final workable solution that may involve knowledge gotten from a very different level of reality to assist us on this one.
885	It's getting harder to battle a disease that is not recognized.
899	I bought a microscope on craigs list for \$25. It has 645X magnification. I have seen worm- like things that are mostly white but also blue and red colored. I also see small flower-like things that are almost invisible except for a small dot that no one can identify.
901	nightmare exascerbated by the incompetent and fearful medical professiononce laughed at and told I did it to myself
919	it hurts, it deforms, it destroys and it totally sucks the big one!!
921	Morgellons red wine spit test resulted in stringy fibrous material. Never had any skin conditions until my 30s.
932	Petroleum jelly seems to relieve intense itching right away. Whenever I use petroleum jelly very tiny black threads come out of area that was itchy. Effected areas are legs, arms, back and between the webbing of fingers. Worse spot is on back. Deep under skin blisters will sometimes appear which is very hard to see. I heard of Morgellons before but dismissed it as a psychological problem before. I only started recognizing it as an issue when I started using petroleum jelly on itchy spots and had lots of little black threads come out. (Just this past year.) I don't care if this is only actually a problem with clothing fiber I just want it to stop itching and ruining my life.
937	I want to say that at one time two years ago I was bitten by wasps. There was a spot on my
	hand that was opened and would not heal. I noticed that it had white fibers coming out of it which I thought was very strange. I thought it was related to the wasp bite. I pulled out the fibers which resembled cotton fibers and ran peroxide over itcovered that with caster oil and bandaid. It healed in a week and has not recurred.
938	my pets are dying and sick too
945	Please help
969	I think I've covered it. Like I mentioned, once I got my mouth cleaned up, Morgellons got

	better. It's not completely gone though.
984	I think that vinegar kills them and vick vaporub do not like them, when i use both of them, I feel relief
986	My anxiety is triggered by the fact that my husband is unable to support me due to his cognitive dissonance, even though I work to keep my vibration high, and commited to my health. This can be exhausting though. Wondering what's going to happen to my body? Is it turning into spaghetti? Harald Kautz Vella says an alkaline body and vibration of love is the protocol.
988	It's been like living in a nightmare. I get the sensation that tiny little ticks are crawling out of me.
1002	Micro red dots on arms looks like petechie
1005	Itchiness of back has been severe and persistent for many years.
1045	Started noticing open sores 04/2014, sores did not heal normally & felt odd. Began to exhibit OCD bx r/t skin. Began examining objects under a loupe magnifier, black specks noted, collected them for a while in a bag & they looked exactly like small seeds & later they began to look like larvae. Morphing continued to present time. Skin lesions seemed to heal summer 2015. At that time I had no access to a cell phone or TV for 3 weeks. As soon as I regained access to call phone & TV the lesions returned with vengeance. EMF's possible link?Presently have multi lesions at times, worm looking things extracted & saved in container with water. Have seen particulate under loupe which a actually pulled a black fiber into its body. This object looked like a granule. Do not have this object now and don't have loupe or microscope now. Have seen a tiny fiber attached to the parasite looking things from skin that don't appear to be textile
1069	I have not seen my best friends in almost a year now due to my unexplainable 'condition'. My
	family has singled me out as mentally unstable, I have had no one else to turn to.
