

Welcome to the Summer Newsletter

Carnicom Institute is a non-profit organization working solely for the benefit of humanity and the public interest. Our goal is to provide the public with beneficial and responsible information concerning human health and the environment. The Institute is extensively active in conducting scientific research and public education relating to the consequences of geoengineering and bioengineering. Thank you for your support of Carnicom Institute. We look forward to providing updates on our current activities and progress.

Conference Announcement !!

This conference is a non-collaborative collective effort of 16 experts blending science, reason and metaphysical elements to share knowledge to help create a better understanding of the aerosol spraying campaign and more. Each speaker will provide information generated from their personal research, study and investigations.

Conference Speakers:

Mr. Clifford Carnicom is the closing speaker of the conference. He will make a connection between geoengineering and bioengineering and further discuss the impact and effects on human health related to Morgellons.

Interviews:

On May 30th researcher Clifford Carnicom was the featured guest on blogtalkradio, interviewed by Szusan Wong, Phd. The discussion focused on aerosol spraying and the artificial manipulation of the Earth and its biology. He discussed the effects on the planet and its inhabitants and the serious environmental and health issues that we must now face. [Blogtalk Interview](#)

Morgellons Research

Carnicom Institute is pleased to announce that the final stages of preparation for the Morgellons Research Project are complete. During the next few weeks, we will be receiving the first sets of scientific data from our participants. More individuals are still needed to qualify for this project. A group of individuals who are in good health are also needed as participants. The healthy individuals will serve as our control group. If you are in good health and are willing to donate your time, we would truly appreciate your participation.

We believe a greater understanding of the Morgellons Condition is vital, and must be accomplished for the benefit of us all. We hope that you will offer us your help. [Get Involved Now!](#)

Environmental Filament Study

A unique environmental filament material has been documented on numerous occasions for more than a decade. It has been found in both an airborne form and at ground level. Carnicom Institute is conducting a comprehensive scientific investigation of filament samples. We are asking the public to provide these samples and we need your help. Follow this link and get involved. [Filament Study](#)

Additional Media:

Boiling Springs Today Magazine will be featuring the Carnicom Institute in their September edition. The magazine is available in local retailers in Boiling Springs, South Carolina and is also available on-line. The magazine features local small business and brings readers the community news that affects the businesses and residences of Boiling Springs.
